

# NCR Corporation and Compris Technologies Serving Up Fresh Advantages

A food-service solution from NCR and Compris designed to work the way restaurants do business.

Let NCR and Compris streamline your operations, provide information for good management decisions, and help improve customer service and employee satisfaction – all designed to increase your profitability.

The NCR and Compris solution combines an easy-to-use graphical interface for your employees, durable engineering and open architecture to ensure years of superior performance.

## Combining Advanced Software Solutions with State-of-the-Art POS Technologies

The Compris Restaurant Suite running on the NCR 7454 Hospitality Point-of-Service System gives your restaurant operators the information and flexibility needed to compete in the worldwide marketplace. Over the past decade, Compris has become widely recognized as a premier global provider of software solutions for the restaurant industry. The Compris solution includes a uniquely flexible POS application, a back-office component for managing restaurant operations, and corporate tools for remote database maintenance and consolidated reporting. Compris customers include some of the largest restaurant operators, whose names are recognized worldwide.

Combining the Compris software with NCR hardware and services provides a single source solution for all types of restaurant concepts, including quick service, table service, pizza delivery, buffet and cafeteria.

# NCR Corporation and Compris Technologies Serving Up Fresh Advantages

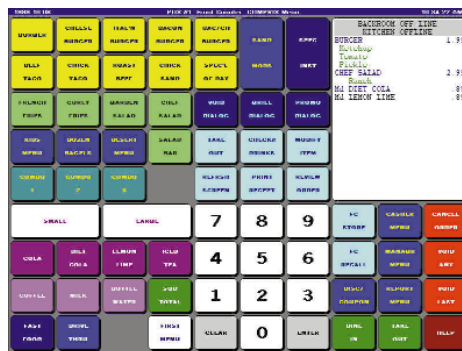

Compris is a Microsoft Certified Solutions Provider Partner – and is the proud recipient of three Microsoft Retail Application Developer (RAD) Awards.

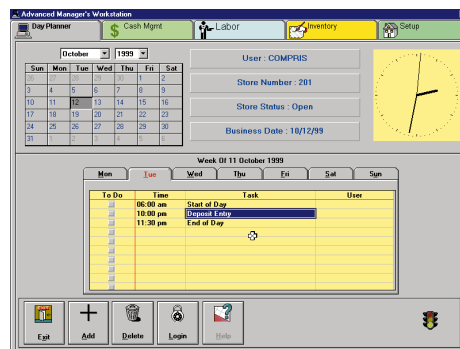

## The Compris Restaurant Suite

### WinPOS

The Windows®-based Compris WinPOS environment helps reduce training time and errors while providing the speed and reliability needed to keep consumers satisfied. With unlimited POS keys, combos, promotions and coupons, and a user-definable graphical interface, WinPOS is designed to be fast and easy to learn. The flexible WinPOS kitchen display system gives users a highly flexible, effective means to improve customer service – not only displaying orders quickly, but displaying speed of service and other statistical information to assist users in effectively managing order flow. WinPOS also provides extensive security by touchscreen input or magnetic-stripe card. More expanded capabilities include multilingual and multicurrency abilities.

## Advanced Manager's Workstation

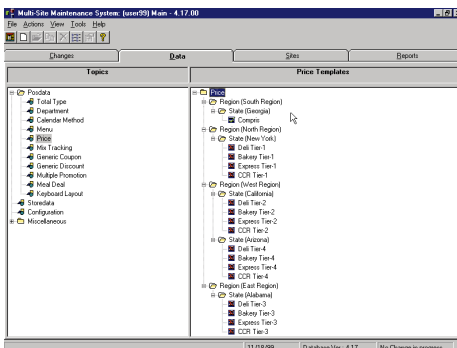

The Advanced Manager's Workstation simplifies tasks, giving your restaurant managers more time to focus on customer service by providing the following features:

- Navigation – Configure your interface for fast, easy operation with daily task lists and user-defined tabs.
- Cash Management – View, print and balance all POS data at your back office.
- Inventory – Control food costs, create invoices, receipts, transfers, credits and waste reports. Reporting includes both theoretical and actual usage and variance tracking.
- Labor – Control labor costs, track time and wages, generate time-cards and avoid employees clocking in too early or clocking out too late.
- Schedule Builder – Generate simple to use schedules for each shift, highlight conflicts and track variances.

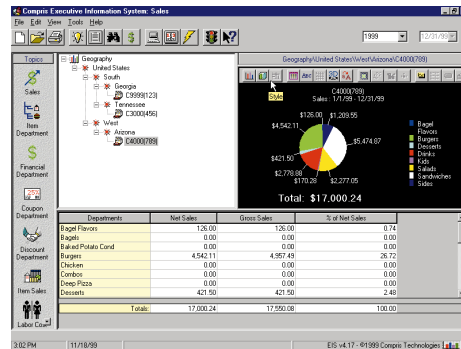

## Corporate Tools

### Multi-Site Maintenance

Manage configuration, pricing, creation of items and promotions for multiple locations and concepts. The Multi-Site Maintenance application allows your corporate operator to maintain any number of POS menu databases remotely. Store changes including pricing, menus, coupons, taxes and discounts are distributed from a central location across multiple restaurants, concepts and sites enabling updates to be performed economically, easily and reliably. These changes can be activated at the correct date, time or promotional period. This centralized control reduces transmission time, cost, duplicate efforts, keying time and support levels, while ensuring data validation and integrity.

### Executive Information System

Get timely, detailed reports with drill down graphs and consolidated data. The Executive Information System is another optional module for your corporate offices that collects store data, consolidates it in a central relational database, and provides a drill down query tool for corporate analysis. The queries produce pre-defined reports/graphs or users can customize reports with a third-party application. Exception reporting, included in the pre-defined reports, enables identification of restaurants not performing to specified guidelines. With accurate and timely information you can support marketing, accounting, and other corporate departments in making key decisions regarding menu pricing, promotion and product sales, and assist in financial and operational areas.

**NCR and Compris embrace industry standards, such as OPOS and ActiveStore initiatives, providing an open platform strategy allowing you to select the configuration of your choice.**

## **Simplifying Your Complex Environment**

The NCR 7454 POS Hospitality System is powerful, flexible and durable. It provides a compact, integrated design and investment protection. This workstation leverages industry-leading technology, such as Web-based management and full multimedia, giving you the ability to use the terminal for interactive employee training.

The ruggedness and superior ergonomics needed in the hospitality industry are also delivered by the NCR 7454. The NCR 7454 – a common platform to simplify your already complex environment.

## **Delivering Superior Service**

To ensure that users can maximize the benefits of their system, NCR and Compris offer a full array of professional services, supplies and ongoing support that can be customized to meet worldwide customer requirements. NCR also offers complete solutions to your business challenges, incorporating consulting, needs assessment, project management, installation and maintenance services.

Compris Technologies is a wholly-owned subsidiary of NCR Corporation and continues to be a leader in providing hospitality software solutions for open technology platforms. Since 1989, many of the largest quick service companies in the world depend on Compris for their in-store hospitality solutions.

NCR implements and supports innovative hospitality solutions that help you transform your customer transactions into meaningful customer relationships.
